

Mobile Bible App — Requirements Documentation

1. FUNCTIONAL REQUIREMENTS

1.1 Bible Reading

- The app shall display all 66 books of the Bible (39 OT, 27 NT)
- The app shall allow users to navigate books, chapters, and verses
- The app shall support chapter-by-chapter reading with previous/next navigation
- The app shall display verse numbers alongside verse text
- The app shall remember the last chapter read and allow users to continue reading

1.2 Verse Interactions

- The app shall allow users to tap a verse to select it
- The app shall allow users to bookmark selected verses
- The app shall allow users to highlight selected verses in 4 colors (Yellow, Green, Blue, Pink)
- The app shall allow users to add personal notes to any verse
- The app shall allow users to remove bookmarks, highlights, and notes
- The app shall allow users to copy verse text to clipboard

1.3 Home Screen

- The app shall display a daily verse that changes every day
- The app shall display a reading streak counter
- The app shall display quick access to popular Bible books
- The app shall display the last read chapter for quick resume
- The app shall display recent reading history (last 10 chapters)

1.4 Search

- The app shall provide full-text search across all stored Bible verses
- The app shall highlight the search term inside results
- The app shall display popular search suggestions
- The app shall save and display recent search history
- The app shall allow users to clear recent search history

1.5 Saved Items

- The app shall display all bookmarked verses in a dedicated tab
- The app shall display all notes in a dedicated tab
- The app shall allow navigation to the source chapter from any saved item
- The app shall allow deletion of individual bookmarks and notes

1.6 Settings

- The app shall allow users to switch between Light, Dark, and Sepia themes
 - The app shall allow users to adjust font size (Small, Medium, Large, Extra Large)
 - The app shall allow users to switch Bible translations (KJV, NIV, ESV, NLT)
-

2. NON-FUNCTIONAL REQUIREMENTS

2.1 Performance

- The app shall launch within 3 seconds on supported devices
- Screen transitions shall be smooth with no visible lag
- Search results shall appear within 1 second of input

2.2 Usability

- The app shall follow Material Design 3 guidelines
- All screens shall be accessible via the bottom navigation bar
- The app shall be usable with one hand on a standard smartphone

2.3 Compatibility

- The app shall support Android 5.0 and above (API 21+)
- The app shall support screen densities from mdpi to xxxhdpi
- The app shall support both portrait orientation

2.4 Data & Storage

- All user data (bookmarks, highlights, notes, settings) shall be stored locally
- User data shall persist between app sessions and restarts
- No internet connection shall be required to use the app

2.5 Security & Privacy

- The app shall not collect or transmit any user data
 - All data shall remain on the user's device only
 - No login or account creation shall be required
-

3. TECHNICAL REQUIREMENTS

3.1 Development

- Language: Kotlin

- UI Framework: Jetpack Compose
- Minimum SDK: API 21 (Android 5.0)
- Target SDK: API 35 (Android 15)
- Android Gradle Plugin: 8.7.3
- Kotlin Version: 2.0.0
- Architecture: MVVM (Model-View-ViewModel)

3.2 Device

- Primary test device: Google Pixel 6 Pro
- Screen: 6.7 inches, 1440 x 3120, 560 dpi
- Android version: API 33/34 (Android 13/14)

3.3 Dependencies

- Jetpack Navigation Compose
 - ViewModel + StateFlow
 - DataStore Preferences
 - Material 3 + Material Icons Extended
 - Gson
 - Androidx Core KTX
-

4. CONSTRAINTS

- iOS is not supported — Android only
 - Full Bible verse text is partially implemented (key chapters only)
 - Translation switching is UI-only — full multi-translation data not yet included
 - Internet connection not required and not used
 - Publishing to Google Play Store requires a one-time \$25 developer fee
-

5. FUTURE REQUIREMENTS (*Nice to Have*)

- Full Bible text for all 66 books and all chapters
- Multiple Bible translations with actual verse data
- Audio Bible playback
- Daily reading plan / devotional
- Cloud sync for bookmarks and notes
- Cross-platform support (iOS via Flutter or React Native)
- Share verse as image to social media
- Offline maps of Bible lands
